

The average GME (Grade Mean Equivalent) for LCCS students the past 3 years has been 2.6 grades above grade level in Math, Reading, Language and 2.4 above in Science compared to the national average.

"Grade Mean Equivalent (GME) describes the year and month of school at which the local group's Mean Scale Score equals the National Mean." Example from graph below: In the last 3 years, 6th graders have averaged a GME of 9.3 in Math/Reading/Language which indicates that they scored at the Mean National Scale Score for students who have completed the third month of Grade 9.
